

FEVEN TAMENE

Software Engineering Student | Flutter & Web Developer

Addis Ababa, Ethiopia | feventamene2@gmail.com | 0965040994
GitHub: github.com/Feven-Tamene | Portfolio: feven-tamene.github.io/portfolio/

PROFILE

Software Engineering student at Addis Ababa University with hands-on experience developing Flutter mobile applications and web applications. Skilled in Dart, Flutter, JavaScript, React, HTML, CSS, Node.js, Express.js, MongoDB, SQL, Git, and GitHub. Experienced in projects involving healthcare discovery, e-commerce, location-based services, event management, and responsive web design.

EDUCATION

Addis Ababa University — BSc in Software Engineering | 2023 – Present

Relevant areas: Programming, Data Structures & Algorithms, Databases, Web Development, Computer Architecture, Networking, Human-Computer Organization, Software Engineering.

Udacity — Nanodegree Program

Programming fundamentals, HTML, CSS, JavaScript, and DOM.

Cisco Networking Academy — Introduction to Cybersecurity

Cybersecurity principles, device protection, networking basics, and online safety.

ACADEMIC EXPERIENCE

Software Engineering Student — Academic Projects | Addis Ababa University | 2023 – Present

- Developed software projects as part of university coursework and group assignments.
- Applied programming, database, web development, and software engineering concepts.
- Built responsive websites and mobile applications.
- Collaborated with classmates on software development projects.
- Practiced debugging, problem-solving, Git/GitHub, and project organization.

PROJECTS

TenaFinder — Healthcare Discovery Platform — *Flutter, Dart, Node.js, Express.js, REST API, MongoDB*

• Healthcare discovery platform for finding hospitals, clinics, pharmacies, diagnostic centers, and doctors. Built Flutter interfaces and worked with REST APIs, appointments, medicines, maps/location, and facility workflows.

Lumière Salon Website — *React, JavaScript, HTML, CSS*

• Responsive salon website with interactive service sections and clean, user-focused UI/UX.

Event Organizing Website — *HTML, CSS, JavaScript, React, Node.js, MongoDB*

• Web application for organizing and managing events, with responsive pages, frontend/backend functionality, and MongoDB data storage.

TaxiTera — Location-Based Website — *Figma, UI/UX Design*

• Location-based website concept designed to help users find nearby taxi terminals in Addis Ababa, with user-focused navigation and interface design.

Lumière Perfume Shop — Mobile Application — *Flutter, Dart*

• Mobile shopping application with product catalog, product details, and initial cart functionality.

TECHNICAL SKILLS

Programming	Dart, JavaScript, Python, C++ (Basic), Java (Basic)
Frontend	HTML5, CSS3, JavaScript, React, JSON, Responsive Web Design
Backend	Node.js, Express.js, REST APIs
Mobile	Flutter, Dart
Databases	MongoDB, SQL, Firebase, Firestore
Tools	Git, GitHub, Postman, Figma, VS Code

LANGUAGES

Amharic: Native **English:** Fluent
